bhanutejamakkineni@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software Engineer with proven expertise across AI/Full-Stack development and Data Engineering. Skilled in building scalable backend systems, LLM agents (LangChain, LangGraph, MCP), and end-to-end cloud data pipelines (Databricks, PySpark, Azure). Experienced in deploying production-ready REST APIs, microservices, and distributed ETL/ELT pipelines.

EDUCATION

Malla Reddy College of Engineering and Technology, B.Tech in CSE (IoT)
CGPA: 9.07

Nov 2022 – May 2026
Hyderabad, India

TECHNICAL SKILLS

Languages	Python, Java, SQL (PostgreSQL, MySQL, T-SQL), JavaScript, Bash
AI & Agent Frameworks	LangChain, LangGraph, MCP Server, RAG Architecture, LLMs, Prompt Engineering
Data Engineering	PySpark, Azure Databricks, ADF, ADLS Gen2, Synapse, Delta Lake, Medallion Architecture
Full Stack & Backend	FastAPI, Spring Boot, React.js, Node.js, REST APIs, Microservices
Databases & Tools	PostgreSQL, MySQL, Azure SQL, Snowflake, MongoDB, Docker, Git, Linux

WORK EXPERIENCE

Software / Data Engineer Intern

June 2025 – Dec 2025

VarenyamAI

Hyderabad, India

- Designed and executed scalable ETL/ELT data pipelines using Azure Databricks, Python, and ADF into ADLS Gen2 and PostgreSQL.
- Developed 15+ REST APIs using Java (Spring Boot) and Python (FastAPI) to integrate AI workflows with frontend React services.
- Integrated LLM agents and multi-agent workflows using LangChain and MCP Server with downstream microservices.
- Optimized SQL queries, schema indexing, and data validation rules, reducing pipeline errors by 35% and query latency by 30%.

PROJECTS

Enterprise Data Pipeline & Analytics Platform | *Databricks, PySpark, ADF, Synapse, Power BI*

- Implemented Medallion Architecture (Bronze/Silver/Gold) processing raw telemetry logs into structured Delta tables.
- Enforced schema enforcement and deduplication via PySpark, feeding curated analytics data into Azure Synapse.

AI Multi-Agent Workflow & Travel Planner | *Python, LangChain, LangGraph, MCP Server*

- Architected an autonomous multi-step planning assistant using LangGraph state machines and contextual memory.
- Implemented dynamic tool orchestration using MCP Server to execute multi-API calls based on real-time user intent.

Full-Stack Cold Outreach & Lead Automation | *Python, FastAPI, React.js, LangChain, PostgreSQL*

- Developed a full-stack platform managing automated lead enrichment, LLM personalization, and outbound campaigns.
- Designed asynchronous FastAPI endpoints and interactive React.js dashboards with real-time analytics.

Real-Time Event Streaming Pipeline | *Databricks, Event Hubs, Structured Streaming, PostgreSQL*

- Built an event-driven streaming pipeline ingesting high-throughput JSON logs via Azure Event Hubs.
- Streamed and parsed events using Spark Structured Streaming on Databricks to trigger automated observability alerts.

CERTIFICATIONS & ACHIEVEMENTS

- Certifications:** Microsoft Certified: Azure Data Fundamentals (DP-900) | CCNA: Introduction to Networks.
- Problem Solving:** Solved **900+** DSA problems across LeetCode and competitive programming platforms.
- Leadership & Delivery:** Built a 500+ member developer community in Hyderabad; delivered 2 client projects to US stakeholders.
