Kottayam, Kerala, India — 📞 +91-9995774679 — ✉️ rahulrp2493@gmail.com — [in LinkedIn](#)

Professional Summary

Senior Java Backend Engineer with 9.5 years of extensive IT experience architecting, developing, and deploying enterprise-grade distributed microservices, secure RESTful web services, and cloud integrations. Specialized in Core Java (JDK 8 to Java 21), Spring Boot, Hibernate/JPA, and SQL database engines (PostgreSQL, Oracle PL/SQL, SQL Server). Proven expertise leading end-to-end legacy platform migrations (MuleSoft to Spring Boot on Kubernetes via Kong API Gateway), enterprise B2B SaaS integrations (Coupa, ServiceNow), and performance tuning with CI/CD GitOps pipelines using ArgoCD, Jenkins, Splunk, and Cursor AI.

Technical Skills

Backend & Frameworks: Java (JDK 8/11/17/21), Spring Boot, Spring Data JPA, Hibernate ORM, Microservices Architecture, RESTful Web Services, Servlets, JSP

Databases & Persistence: PostgreSQL, Oracle 11g/12c, Microsoft SQL Server, PL/SQL, Query Optimization, Database Indexing, Stored Procedures

Cloud, DevOps & Orchestration: Basic AWS, Docker, Kubernetes, ArgoCD (GitOps), Kong API Gateway, Jenkins (CI/CD Pipelines), Git, Maven, Gradle

Observability & Monitoring: Splunk, Grafana, Haystack Distributed Tracing, DevPortal, Cyberflow, Application Log Analysis

Testing & Code Quality: JUnit, Mockito, Test-Driven Development (TDD), SonarQube, JMeter, Performance Profiling, Peer Code Reviews

Integrations & Tools: Coupa API Integration, ServiceNow Integration, BIRT Reporting, Postman, JIRA, Cursor AI

Methodologies & Domains: Agile/Scrum, Full SDLC, Banking & Financial Services (BFSI), Travel Tech, E-Commerce, Automotive, Telecom

Professional Experience

Senior Associate – Projects

May 2025 – May 2026

Cognizant

Kochi, India

- Lead technical development, maintenance, and L3 production support for enterprise microservices integrating Intuit EBiz core systems with the Coupa B2B platform.
- Engineered middleware adapters **ebiz-user-int** and **coupa-user-int**, validating business payload rules and marshaling data into compliant Coupa REST API formats.
- Spearheaded architectural runtime modernization, successfully migrating production Spring Boot microservices from Java 8 to Java 21.
- Executed automated GitOps continuous deployments via ArgoCD and Jenkins, verifying deployment health in post-release validation windows.
- Conducted Root Cause Analysis (RCA) on recurring production alerts using Splunk log indexing and DevPortal telemetry, implementing permanent bug fixes.
- Collaborated with product owners and global stakeholders to translate business requirements into technical specs, release runbooks, and KB documentation.

Specialist – Software Engineer

Aug. 2023 – May 2025

LTIMindtree

Bengaluru, India

- Architected and migrated legacy MuleSoft integrations into containerized Spring Boot RESTful microservices for HSBC Banking within the ITID platform.
- Configured secure routing policies, rate limiting, and access tokens on the Kong API Gateway platform to manage bidirectional traffic with ServiceNow.
- Created technical system blueprints including Low-Level Design (LLD) documents, OpenAPI/Swagger specifications, and UAT promotion checklists.
- Automated CI/CD build scripts and container release pipelines deploying to Kubernetes clusters via Jenkins, achieving zero-downtime cutovers.
- Promoted microservice releases across SIT and UAT environments, maintaining over 85% unit test coverage via JUnit, Mockito, and SonarQube quality gates.
- Conducted technical API feature walk-throughs for banking stakeholders and directed peer code reviews to enforce OWASP security compliance.

Senior Software Engineer

Mar. 2021 – Oct. 2022

UST Global

Kochi, India

- Executed the complete SDLC for Nissan Motors' SHEMS portal, managing safety certifications and qualification compliance across plant workers.
- Developed backend microservice modules and REST contracts using Java 8, Spring Boot, Spring Data JPA, and PostgreSQL.

- Designed relational tables, compound indices, and transactional stored routines, ensuring high database throughput under heavy multi-tenant operations.
- Configured automated build and continuous deployment pipelines using Jenkins and Git version control.
- Authored detailed technical troubleshooting runbooks and maintained operational architecture documentation for offshore support teams.

Senior Software Engineer

Nov. 2017 – Jan. 2021

IBS Software

Kochi, India

- Engineered distributed flight search, real-time booking, and ticket itinerary management microservices for Expedia and partner travel platforms.
- Developed low-latency RESTful APIs capable of processing concurrent flight queries and reservations during peak travel traffic.
- Triaged and resolved live production incidents by diagnosing distributed request lifecycles using Splunk, Grafana, and Haystack.
- Enforced software stability and regression prevention by constructing thorough unit and integration test suites using JUnit and Mockito.

Junior Software Engineer

Mar. 2015 – May 2017

Reliance Communications

Navi Mumbai, India

- Developed backend application components for Location Based Services (LBS), enabling subscriber tracking, buddy finder, and location offers.
- Engineered server-side logic using Java, Servlets, JSP, and Oracle PL/SQL database procedures, functions, and triggers.
- Built operational analytics and business intelligence reports utilizing the BIRT reporting engine, scheduled across telecom operational teams.
- Participated in bug fixing, query tuning, and functional requirement gathering with technical leads and business analysts.

Key Projects & Technical Contributions

Intuit Enterprise Coupa Integration | *Java 21, Spring Boot, Microservices, ArgoCD, Splunk, DevPortal*

Cognizant

- Developed bidirectional integration middleware connecting internal accounting platforms with Coupa API infrastructure for seamless procurement.
- Migrated legacy services to Java 21 virtual threads, boosting server throughput and minimizing GC pauses during bulk data synchronizations.

HSBC Banking ITID Platform Migration | *Spring Boot, Kong API Gateway, Kubernetes, ServiceNow, Jenkins*

LTIMindtree

- Decoupled tightly coupled MuleSoft legacy services into autonomous Spring Boot microservices deployed on enterprise Kubernetes clusters.
- Engineered low-latency REST endpoints integrated with ServiceNow to automate internal bank IT service requests and incident governance.

Nissan Motors SHEMS Training Platform | *Java 8, Spring Boot, PostgreSQL, Spring Data JPA, Jenkins*

UST Global

- Built a role-based certification platform tracking worker qualifications, hazardous training approvals, and plant compliance verification.
- Engineered normalized PostgreSQL relational models ensuring immediate consistency and auditable activity logs for safety inspectors.

Expedia Global Travel Platform | *Java 8, Spring Boot, Microservices, Splunk, Grafana, Haystack*

IBS Software

- Engineered high-concurrency flight availability search and reservation microservices handling high query volumes across global affiliates.
- Configured end-to-end distributed transaction tracing via Haystack, reducing root-cause resolution time on live booking anomalies.

Location Based Services (LBS) | *Java, Servlets, JSP, Oracle PL/SQL, BIRT Reports*

Reliance Communications

- Implemented geo-tracking business logic and automated transaction logs using optimized Oracle PL/SQL procedures and triggers.
- Generated scheduled BI performance reports using BIRT, tracking user engagement across geo-targeted telecom campaigns.

Education & Professional Credentials

Institute of Human Resources Development (IHRD)

Kerala, India

Bachelor of Science (B.Sc.) in Computer Science

NIIT

Navi Mumbai, India

Professional Diploma in Enterprise Java (J2EE)
